Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (US 6,251,209) in view of Francis, Jr. (2,464,301).

Johnson disclose an apparatus for making and filling a bag with a strippable seal comprising a pair of thermal sealing bars 2159 for embossing a wavelike or zig-zag shape upon the bag material 2056 passing between; see figures 19 and 33.

Johnson does not disclose the seal former as a pair of thermal rollers, however Francis, Jr. teaches thermal rollers 45 and 46 (figure 6) with annular projections for embossing/forming the web passed between a nip for conveyance. It would have been obvious to one of ordinary skill in the art to use thermal rollers with annular projections as taught by Francis, Jr. as a substitution for the sealing bars of Johnson for forming the wavelike seal.

Response to Arguments

3. Applicant's arguments filed 4/3/03 have been fully considered but they are not persuasive.

Johnson clearly teaches a strippable seal (see figure 19).

The bag/web material movement is irrelevant to the sealing operation. The sealing thermal rolls of Francis could be moved transversely to the material as it is in a stationary position.

Furthermore concerning Francis, activating thermoplastic fibers is a clear description of heating a thermoplastic material in order to seal/mold it. See figures 7 and 8 for the wavelike/zigzag shape taught by Francis.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
